

FARHATHULLAH NAJEEB

Flutter Developer | Cross-Platform Mobile Application Developer

farhathullahmn@gmail.com | +91 9188044462 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Kerala, India

PROFESSIONAL SUMMARY

Flutter Developer with 3+ years of experience and 5 published apps on App Store and Google Play, spanning fintech, edtech, and enterprise domains. Specialized in digital wallets, payment gateway integrations (Stripe, Razorpay, NomuPay, HyperPay, Network Pay), real-time systems (WebRTC, Socket.IO), and Clean Architecture with BLoC/Riverpod. Skilled in native Android (Kotlin) and iOS (Swift) integration via Flutter Method Channels, Firebase, and REST APIs. Also brings hands-on experience delivering React/Next.js web platforms and MT5-integrated trading systems for agency and freelance clients.

KEY ACHIEVEMENTS

- Delivered 9+ production applications across mobile and web — spanning fintech, edtech, real estate, e-commerce, and trading — with 4.5+ star ratings and zero critical post-launch defects.
- Engineered a unified payment gateway abstraction layer (NomuPay, HyperPay, Network Pay, Stripe, Razorpay) with automatic retry logic, cutting payment failure rates by 30%.
- Cut Firebase data sync latency by 35% and app load times by 40% through query optimization, lazy loading, and image caching across multiple Flutter applications.
- Extended beyond mobile into React/Next.js web platforms and MT5-integrated trading systems, shipping e-commerce, construction, workforce-management, and forex trading products for agency and freelance clients.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Clean Architecture, BLoC, Riverpod, Provider, Material Design, Responsive UI

Native: Kotlin, Swift, Flutter Method Channels, APNs, WebRTC, QR/NFC Integration, In-App Purchases

Payments: Stripe, Razorpay, NomuPay, HyperPay, Network Pay, Apple Pay, Google Pay

Backend: REST APIs, WebSockets, Socket.IO, Firebase (Auth, Firestore, FCM, Storage), SQLite

Web: React.js, Next.js, Vite, JavaScript (ES6+), HTML5, CSS3

Tools: Git, GitHub Actions, CI/CD, Postman, Swagger, Xcode, Android Studio, Figma

WORK EXPERIENCE

Senior Software Developer – Flutter | Jun 2025 – Present

Pips Technologies Pvt Ltd — Kochi, Kerala

- Developed and maintained GoldVault+, a production-grade Flutter application enabling users to securely buy, sell, store, and manage digitally-backed 24K physical gold.
- Integrated secure payment gateways (NomuPay, HyperPay, Network Pay), digital wallet, and KYC verification, reducing payment failures by 30% through automatic retry logic.
- Implemented real-time gold price updates, Gold SIPs, automated purchase flows, and portfolio management.
- Integrated native Android (Kotlin) and iOS (Swift) features using Flutter Platform Channels for hardware-level access.
- Optimized application performance, security, and cross-platform user experience, cutting Firebase data sync latency by 35%.

Senior Software Developer – Flutter | Jun 2024 – Jun 2025

Crudops Pvt Ltd — Ernakulam, Kerala

- Designed and shipped RingMe – a live communication app with WebRTC P2P audio/video calls, Socket.IO group chat, and QR/NFC device pairing on App Store and Google Play.
- Implemented Apple and Google In-App Purchase subscription flows, enabling premium monetization for the platform.
- Delivered native iOS features in Swift, completing full release cycle from development to App Store approval.

Software Developer – Flutter | Jan 2023 – Jun 2024

LucidPlus IT Solutions — Thrissur, Kerala

- Developed 3 cross-platform apps (ERP, VILA billing, e-commerce) with Stripe and Razorpay integrations, serving clients across multiple industries.
- Optimized app performance via lazy loading and Firebase query tuning, achieving a 40% reduction in load time.
- Established CI/CD pipelines for App Store and Google Play, reducing release turnaround from days to hours.

KEY PROJECTS

GoldVault+ — Digital Gold Investment Platform (FinTech, Flutter)

- A cross-platform FinTech application that enables users to securely invest in, manage, and redeem digitally-backed 24K physical gold with real-time pricing, Gold SIPs, payment integration, and portfolio management.
- Enables users to buy, sell, store, and manage digitally-backed 24K physical gold with live market pricing.
- Gold SIPs and automated purchase flows for recurring, disciplined gold investment.
- Digital wallets, real-time portfolio tracking, and interactive portfolio analytics.
- Gifting and redemption of physical gold or jewellery directly through the app.
- Secure payment integrations, KYC verification, biometric authentication (Face ID/Fingerprint), and scalable cross-platform architecture.

RingMe — Real-Time Communication App (Flutter)

- WebRTC P2P audio/video calls, Socket.IO group chat, QR/NFC device pairing, and In-App Purchase subscription monetization.

E-Wallet — Secure Digital Banking App, Iran (Flutter)

- Iran-focused digital banking application built with bank-grade, end-to-end encryption across every transaction flow.
- Implemented secure fund transfers, bill payments, biometric authentication, and detailed transaction analytics.

Zealosh — Edtech Learning Platform (Flutter)

- Built live class streaming and live exam modules with real-time scoring and student ranking/leaderboards.
- Delivered video learning modules, score dashboards, and study reminder notifications.

VILA — Desktop Billing & Inventory Platform (Flutter)

- Built a Flutter desktop billing application with print-ready invoicing for retail/wholesale operations.
- Implemented stock/inventory tracking, purchase amount tracking, and multi-client financial reporting.

Urban Aana — Streetwear E-commerce Platform (Next.js) urbanaana.com

- Kerala-inspired streetwear e-commerce platform with OTP-based sequential authentication and Axios interceptor refactoring for robust sessions.
- Built dynamic checkout with phone validation, pincode verification, and a 3D interactive globe component.

Velocity Homes (PMC Velocity) — Construction Consultancy Website (React) homesbyvelocity.com

- Responsive construction consultancy website for the Kerala/Karnataka market built with React, TypeScript, and Tailwind CSS.

Attendance Management System — Admin & Employee Portal (React)

- Full-featured system with sub-admin creation, office timing/holiday configuration, leave/attendance approvals, and Excel/PDF reporting.
- Employee module with check-in/check-out, late-arrival and early-checkout flagging, leave application, and attendance history export.

Arakkal Trading — XAUUSD Trading Platform (React + Vite)

- Trading platform focused on XAUUSD (Gold/USD) with MT5 (MetaTrader 5) integration for live trading connectivity.
- Implemented deposit and withdrawal flows for the trading account.

EDUCATION & CERTIFICATIONS

- B.Sc Psychology – MG University, Kerala
- Flutter Development – Edapt
- Web Application Security (OWASP)
